INDEX

Volume 29 Nos 1–10
January/February–December 1987

REPORT INDEX

Artificial Intelligence 46
Call accounting 103
Computer-aided electronic engineering (CAEE) 229
Computer-assisted software engineering (CASE) 229
Computer environments 273
Computers in USA 46
Computers per desk 273
Computer salaries 48
Computer security 273
Databases 105
Databases 102
DEC and IBM 341
Electronic document interchange 342
Electronic publishing 103
European LANs 341
Fourth-generation languages 341
Fourth-generation languages
Information technology in the UK 102
Information technology in the UK 46
Information technology in Europe 102
IT staff
Integrated Office Systems 228
IBM and clones 104
IBM and DB2 228
IBM and X.25 103
IBM PC software 399
Korean computer industry 400
Lap-top computers 343
Optical discs 342
Parallel computing 47
Programmable controllers 47
Unix 343
Unix 400
Voice processing 288
Wideband communications 48

BOOKS REVIEWED

Anderson, R
Management, Information Systems and Computers: An Introduction 226
Bell, D, Morrey, I and Pugh, J
Software Engineering – a Programming Approach 395
Bull, M
The Pick Operating System 395
Boland, R J Jr and Hirscheim, R A
Critical Issues in Information Systems Research 570
Bornat, R
Programming from First Principles 99
Christie, B
Human Factors of the User-System Interface 570
Clifton, H D
Business Data Systems 271
Elbra, A
Security Review Manual 99
Garfinkel, J
The COBOL 85 Example Book 271
Keen, J S
Managing Systems Development 454
Kendall, P A
Introduction to Systems Analysis and Design 518
Koster, C H A
Top-down Programming with ELAN 518
Layzell, P J and Loucopoulos, P
Systems Analysis and Development 270
Mardick, R G and Munson, J C
MIS Concepts and Design 226
Mitchell, R
Industrial Software Technology 454
Newman, W M
Design Integrated Systems for the Office Environment 100
Schaeffer, H
Data Center Operations – A Guide to Effective Planning, Processing and Performance 270
Schneiderman, B
Designing the User Interface: Strategies for Effective Human-Computer Interaction 340
Sharman, G
Introduction to Database on Microcomputers 571
Walker, A, McCord, M, Sowa, J F and Wilson, W G
Logical Approach to Expert Systems and Natural Language Processing: Knowledge Systems and PROLOG 339
Wiatrowski, C A and Wiener, R S
From C to MODULA-2... and Back 571
Wolfgram, D D, Dear, T J and Galbraith, C S
Expert Systems for the Technical Professional 455

AUTHOR INDEX

Ampt G, J
On the integration of software design *information* 321
Alexander, H and Potter, B
Case study: the use of formal specification and rapid prototyping to establish product *feasibility* 388
Bader, J, Hannaford, D, Cochran, A and Edwards, J
Intellipse: towards knowledge-based tools for the design of commercial data *processing* 431
Bell, D A, Grimson, J B and Ling, D H O
EDDS – a system to harmonize access to heterogeneous databases on distributed *micros and mainframes* 362
Berg, R A
see Card, D N 235
Blacklock P
COBOL standards: the need for change 159
Blum, B An overview of TEDIUM 475
Brouwer-Janse, M D and Grunes, M
Design of an intelligent interface for a *software planning tool* 540

COBOL standards: the need for change 159
Blum, B An overview of TEDIUM 475
Brouwer-Janse, M D and Grunes, M
Design of an intelligent interface for a *software planning tool* 540

Burgess, R S
Designing Codasyl database using JSP 151

Campbell, I
Standardization, availability and use of PCTE 411
Card, D N, Clark, T L and Berg, R A
Improving software quality and productivity 235
Card, D N
A software technology program 291
Clark, T L
see Card, D N 235
Chen, G and Williams, M H
Executing PASCAL programs on a PROLOG architecture 285
Cochran, C
see Bader, J 431
Cockshott, W P
Persistent programming and secure data storage 249
Cockton, G
Interaction ergonomics, control and separation: open problems in user interface management 176
Cuelenaere, A M E, Genuchten, van M J I M and Heemstra, F J
Calibrating a software estimation model: why and how 558

Davies, C G
see Sutcliffe, A G 115
Doberkat, E E and Gutenbeil, U
Tree transformations as a tool for source-to-source translations 548
Docker, T W G
A flexible software analysis tool 21
Dugard, P I
see Samson, W B 242
Dyer, M
An approach to software realiability measurement 415

Easterby, R
Trillium: an interface design prototyping tool 207
Edwards, J
see Bader, J 431
Er, M C
Matching information systems with corporate information needs 66
Erlandsen, J and Holm, J
Intelligent help systems 115

Fenton, N E and Kaposi, A A
Metrics and software structure 301
Feiler, P and Kaiser, G E
Granularity issues in a knowledge-based programming environment 531
Gallop, J
User interface management and graphics standards 202
Garner, B J
Expert systems: from database to knowledge base 60

see Bader, J 431
Haylett, G M
see White, N H 75
Heemstra, F J
see Cuelenaere, A M E 558
Hekmatpour, S
see Ince, D C 8
Hitchcock, P
Introduction to integrated project support environments 15
Holm, J
see Erlandsen, J 115
Hull, M E C and Metcalfe, F G
An automated systems design tool 257

Ince, D C and Hekmatpour, S
Software prototyping – progress and prospects 8

Jones, R
IPSEs for DP departments 330

Kaiser, G E
see Feiler, P 531
Kaposi, A A
see Fenton, N E 301
Kilgour, A
Theory and practice in user interface management systems 171

Larkin, I N
The user is always right 214

Ling, D H O
see Bell, D A 362
Lingat, J Y, Nobecourt, P and Rolland, C
Rubis: an extended relational system managing events
Part I: Specification 503
Lingat, J Y, Nobecourt, P and Rolland, C
Rubis: an extended DBMS managing events
Part II: Implementation 523

MacLean, Allan
Human factors and the design of the user interface management system: EASIE as a case study 192
Mellor, P
Software reliability modelling: the state of the art 81
Metcalfe, F G
see Hull, M E C 257

Nevill, D G
see Samson, W B 242
Nobecourt, P
see Lingat, J Y 503
Nobecourt P
see Lingat, J Y 523

Palmer, T R
GRAPE programming environment 219
Potter, B
see Alexander, H 388

Rahman, W
Software quality by management 511

Redmond, J A and Ryan, K T
Prospects for a method driven software development environment 421
Reilly, R
Ill-formedness and miscommunication in person-machine dialogue 69
Reynolds, R G
Metric-base reasoning about pseudocode in a partial metrics system 497
Rodriguez, V and Tsai, W T
A tool for discriminant analysis and classification of software metrics 137
Rolland, C
see Lingat, J Y 503
Rolland, C
see Lingat, J Y 523
Ryan, K T
see Redmond, J A 421

authors index contd.

Samson, W B
Predictive software metrics based on a formal specification 242

Slusky, L
Integrating software modelling and prototyping tools 379

Son, S H
Using replication to improve reliability in distributed information systems 440

Sutcliffe, A G
MAJIC – an integrated program support environment 122

Sutherland, J
Minimum parameters commercial systems generation 372

Tozer, J
Prototyping as a system development methodology: opportunities and pitfalls 265

Tsai, W T
see Rodriguez, V 137

Veryard, R
Future of information systems design methodologies 33

Veryard, R
Tension and information systems 358

Veryard, R
Implementing a methodology 469

White, N H
Advanced diagnostics: a PASCAL interactive system 75

Wordswoth, J
Education in formal methods for software engineering 27

Williams, M H
see Chen, G 285

SUBJECT INDEX

Applications

Case study: the use of formal specification and rapid prototyping to establish product feasibility 388
GRAPE programming environment 219
IPSEs for DP departments – overview and case study 330
Prototyping as a system development methodology: opportunities and pitfalls 265
Trillium: an interface design prototyping tool 207
The user is always right 214

Communications

Ill-formedness and miscommunication in person-machine dialogue 69

Information management

Expert systems: from database to knowledge base 60
Implementing a methodology 469
Matching information systems with corporate information needs 66

Policy

Standardization, availability and use of PCTE 411
Software quality by management 511
Tension and information systems 358

Software development

A software technology program 291
A tool for discriminant analysis and classification of software metrics 137
An approach to software reliability measurement 415
An automated systems design tool 249
Calibrating a software cost estimation model: why and how 558
Design of an intelligent interface for software planning 540
Granularity issues in a knowledge-based programming environment 531
Integrating software modelling and prototyping tools 379
Metrics and software structure 301
On the integration of software design information 321
Persistent programming and secure data storage 249
Prospects for a method-driven software development environment 421
SETL to ADA – tree transformations applied 548

Systems

A flexible software analysis tool 21
Advanced diagnostics: a PASCAL interactive system 69
An overview of TEDIUM 475
EDDS – a system to harmonize access to heterogeneous databases on distributed micros and mainframes 362
Education in formal methods for software engineering 27
Executing PASCAL programs on a PROLOG architecture 285
Future of information systems design methodologies 33
Human factors and design of user interface management systems: EASIE as a case study 192
Improving software quality and productivity 235
Intelligent help systems 115
Interaction ergonomics, control and separation open problems in user interface management 176
Intellipse: towards knowledge-based tools for the design of commercial data processing systems 431
Introduction to integrated project support environments 15
MAJIC – an integrated program support environment 122
Metric-based reasoning about pseudocode design in the partial metrics system 497
Minimum parameters commercial systems generation 371
Predictive software metrics based on a formal specification 242
Rubis: an extended relational system managing events Part I: Specification 503
Rubis: an extended DBMS managing events Part II: Implementation 523
Software components and reuse – getting more out of your code 38
Software prototyping – progress and prospects 8
Theory and practice in user interface management systems 171
User interface management and graphics standards 202
Using replication to improve reliability in distributed information systems 440

Tutorial

COBOL standards: the need for change 159
Designing Codasyl database using JSP 151
Software reliability modelling: the state of the art 81
